Description

Still some issues with the whois output in some cases:

- [Whois] Tucos Tucos is logged in as <-- account should be last
- [Whois] idle message: nom 74356 1280068712 seconds idle, signon time <-- not parsed, only when no IrcUser is present

i'll be hacking on this one myself, shouldn't be too hard

#2 - 07/27/2010 05:46 PM - Anonymous

Added merge request which fixes the idle times, but not for the logged in line, because that numeric is not in any of the rfc's (which have no knowledge about services)
