Quassel IRC - Bug #1823

Potential bug: Database corrupted by latest build?

07/27/2022 08:49 AM - Luminair

Target version:			
Version:	0.14.0	**OS:**	Linux

Description

I updated my Docker container on Intel Synology NAS to the latest build 0.14.0-ls121 and now I can't connect to the database in any build.
https://github.com/linuxserver/docker-quassel-core/releases/tag/0.14.0-ls121

I just went back to an arbitrary older build 0.14.0-ls119 and loaded a backup database and it works.

I'm not an expert at this stuff, so anything could have happened and I could have missed it, but I want to let you all know in case there is a showstopper bug.
