

Quassel IRC - Bug #297

Change the default /j alias to accept channel passwords

08/28/2008 02:26 AM - sph

Status:	Resolved	Start date:	
Priority:	High	Due date:	
Assignee:	EgS	% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:	0.3.1	OS:	Any
Version:	0.13.1		
Description			
Currently it's "/join \$1". However, joining a passworded channel this way doesn't work because the second parameter (the password) is ignored. Setting the default to "/join \$0" would be nicer.

fixing BR #297 - the core now really loads the default aliases if the list is empty

History

#1 - 10/31/2008 02:15 PM - EgS

Those aliases sound reasonable. I've added them in current git:

<http://git.quassel-irc.org/?p=quassel.git;a=commit;h=eb8ee27deb8346dbf9e8515b0cceedf58cda971b>

Note: the default aliases will only load if your current alias list is empty. Alias list is loaded on core start.

So if you have an old account you will have to clear your alias list and restart the core to load the new aliases. Otherwise you can also just add them yourself.

#2 - 11/15/2008 12:48 AM - Sputnik

Doesn't seem to work for some users, details follow.

#3 - 11/15/2008 12:51 AM - billie

It seems that removing the alias list and restarting the core does not load the default aliases automatically.

#4 - 11/15/2008 12:02 PM - EgS

Fixed in current git:

<http://git.quassel-irc.org/?p=quassel.git;a=commit;h=8179670f13fbbdd5cbcd7fb4a3dc187913ee9ba3>

Please add the info next time immediately... a copy paste from IRC suffices.
