Quassel IRC - Feature #553

add reconnect timer for core connection

02/12/2009 11:32 PM - katastrophe

Target version:			
OS:	Any		

Description

often i start up my laptop but the wifi takes some time to establish the connection, so the connection to the core fails. it would be cool if i hadnt to press retry, but the client would try to reconnect automatically.

It would also make sense to have the client make its best effort to not connect to a core until an active network connection has been established.

Detecting network connectivity should be doable via dbus, no?
