

Quassel IRC - Feature #989

Add ignore highlight option in a channel's context menu

Description I don't want to get those notifications from highlights in certain channels. An option to ignore those (but still show them) would fit in nicely along with the "hide events" in the channel context menu.

This can be done in 0.13 (as of this comment, -rc1 is out) with remote highlights. There's a 'Highlight Ignore Rules' tab, which can be used for blank message (or ".*" with regex) and set per channel, etc.
