Problem is still here for Quassel :

Version : v0.10.0 (dist-575f27e)

When I launch Quassel, it connects to freenode automatically but fails to aujoin +r channels

[09:02:58] * #omni: Cannot join channel (+r) - you need to be identified with services
[09:02:59] * 396 unaffiliated/dr-shadow is now your hidden host (set by services.)
[09:02:59] [NickServ] You are now identified for Dr-Shadow.

#2 - 08/07/2014 09:53 AM - Dr-Shadow

It seems to be related to this code : https://github.com/quassel/quassel/blob/master/src/core/corenetwork.cpp#L586

The identify takes too much time and the mode is set +r on user once we already tried to join the channels.

The idea would be to sync (wait the return from nickserv) but this would lead to issues (if nickserv is not present for example).

- Status changed from New to Closed

Closed as a duplicate and SASL is the solution.
