| <p>Right now it is not possible to back up the quassel database without stopping quasselcore. cp copies invalid data (Error: database disk image is malformed), and something like<br/>sudo sqlite3 /var/lib/quassel/quassel-storage.sqlite ".backup \$dest/quassel-storage.sqlite" fails with Error: database is locked.<br/>Apparently sqlite live backups are only possible using an in-process API: <a href="http://www.sqlite.org/backup.html">http://www.sqlite.org/backup.html</a></p> |              |                        |            |
