<b>Target version:</b>		<b>OS:</b>	Linux
<b>Version:</b>	0.7.1		
<b>Description</b>			
Hello,			
the quasselcore did break during night (nobody was connected), logs are attached.			
The logs start to be interesting at 2011-10-24 01:21:20 (disconnect?)			
At 2011-10-24 01:43:24 (it seems similar to bug <a href="#">#958</a> ) the database is getting screwed.			
In my opinion the crucial line is			
2011-10-24 02:34:11 Error: ASSERT: "!createBuffer" in file /build/buildd/quassel-0.7.2/src/core/coresession.cpp, line 280			
After that there are restart attempts of the core, but clients cannot proceed to connect ("Synchronizing to Core...").			
core --version			
Quassel IRC: v0.7.2 (dist-f93ace0)			
Best Regards			
Stefan
