Seems to be an issue with the theme (engine); works fine here with GTK+ as selected GUI Style in qtconfig and adwaita-dark as gtk theme. Can you share some details?

This occurs when using Air and Helium themes in KDE. Air is the default desktop theme in KDE.

I am unable to reproduce this issue on Fedora 34 KDE, either on 0.13.1 or git HEAD.

I suspect that at some point, this was fixed without realizing, perhaps the result of a code overhaul.

I'm going to close this issue, but if you continue to have this issue please feel free to reopen it.
