BR #117:

idling time information will now only be available if it is not too old
users "logged in" time is now available

Revision a801d1ea - 03/12/2008 12:14 PM - Alexander von Renteln

BR #117:

idling time information will now only be available if it is not too old
users "logged in" time is now available

History

#1 - 02/25/2008 03:32 PM - EgS

I think the idling information is quite cool, but only if it's at least almost valid ;)

So why not show it when the core receives idle information and automagically remove it after a few minutes? This guarantees that the information is valid at least to some degree.

#2 - 02/25/2008 07:49 PM - phon

regarding the idle-information:
perhaps it would suffice to additionally display how old the information is.

also an updating the idle information when receiving messages in queries and channels might be nice.

#3 - 02/25/2008 08:21 PM - EgS

perhaps it would suffice to additionally display how old the information is.

Jeah thought about that too. But I think that isn't really intuitive: "Idle since 4 hours (last time checked 4hours ago)".
And if you know that the information is 3days old, what use does it have then?

also an updating the idle information when receiving messages in queries and channels might be nice.

That's a good Idea. Basically it's only resetting the value so there isn't much work involved.

#4 - 03/12/2008 12:17 PM - phon

*idling time information will now only be available if it is not too old
*users "logged in" time is now available

#5 - 03/12/2008 10:59 PM - EgS

New things come to my mind :)

1.) to display the nick again in the hostmask is a bit redundant. Maybe strip it? I.e.: EgS!n=egs@quassel-irc.mindpool.net -> n=egs@quassel-irc.mindpool.net

2.) Display the Usermodes?

#6 - 03/13/2008 12:02 PM - phon

*user modes are displayed if available

*redundant info stripped from the hostmask
