

Quassel IRC - Bug #1175

Bundled Quassel does not support HiDPI

06/29/2012 11:50 PM - Bruun

Status:	Resolved	Start date:	06/29/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Quassel GUI (Qt)	Estimated time:	0.00 hour
Target version:		OS:	Mac OS X
Version:	0.8-pre		
Description			
The current Quassel Mac bundle does not look good when running on the new Macbook with Retina (HiDPI) display. A simple solution was found here: http://www.mail-archive.com/development@qt-project.org/msg04396.html			
Add the following to the Info.plist:			
<pre><key>NSPrincipalClass</key> <string>NSApplication</string></pre>			
Tested and confirmed working on OS X Lion 10.7.4 on 0.8.0-7-g13a63e4
