

Quassel IRC - Bug #1188

Remember active buffer, chat lists tree state

09/21/2012 09:36 AM - gry

Status:	New	Start date:	09/21/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.7.3		
Description			
After restarting quasselclient, the chat list tree is always expanded, and I see a server buffer active. However it could be convenient to remember that some parts of chat list tree are collapsed and a certain channel/query is active.
