

Quassel IRC - Bug #1193

'Reset' color code doesn't respect Quassel theming.

11/18/2012 05:37 AM - rikai

Description

The color parsing currently ignores theming when the reset code (^O/ASCII decimal 15/hex 0x0F) is used.

This is especially annoying on dark themes, as it seems to always default to black for its color, so you end up with black text on a dark colored background, which is essentially impossible to read.

Can be easily replicated by coloring some text and using a reset code in the middle while using a theme, especially obvious to see with Jussi's theme from <http://quassel-irc.org/node/104> as an example.
