<b>Description</b>			
Paraphrased from Tucos in the IRC channel: 1. "a [bunchofspaces] a" shows 'a' on the first line and 'a' as first char on the second line with all spaces gone; 2. "[bunchofspaces] ab" shows 'b' as first char on the next line. 3. "[bunchofspaces] a" can hide 'a' even with multiple lines of untrimmed whitespace (lucky amount, i guess)  This bug is referencing situation 3.
