

Quassel IRC - Bug #1212

text inputWidget doesn't expand in size in multiline mode on Mac OS X

04/12/2013 10:56 PM - stepheneb

Status:	Resolved	Start date:	04/12/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Quassel GUI (Qt)	Estimated time:	0.00 hour
Target version:		OS:	Mac OS X
Version:	0.9-pre		
Description			
<p>Multiline mode is enabled. When I enter multiple lines by pressing shift-enter the multiple lines are displayed correctly in the inputWidget but the inputWidget doesn't expand in size so the previous lines scroll up an out of sight.</p> <p>Screenshot from Mac OS X: VrqbqFD.png</p> <p>Screenshot of feature working on linux: 2013-04-12_10-42-50.png</p> <p>I have a branch where you can see what I've tried in my attempts to fix the problem: https://github.com/concord-consortium/quassel/tree/expand-multiline-entry-on-macos</p> <p>I know very little about C++ or QT ... and the work in that branch does not fix the problem.</p> <p>Perhaps it's just a bug in WTs QComboBox::AdjustToContents on Mac OS X.</p> <p>I checked the QT bug tracker and didn't see a bug there.</p> <p>System:</p> <p>Mac OS X 10.6.8 QT 4.8.4 installed with homebrew</p> <p>Tested on both stable v0.8.0 release of quassel and master branch build from 20130412:96d18ff3</p>
