Quassel IRC - Bug #1214

Quassel crashes on changing channels

04/16/2013 07:29 PM - cordawyn

Status:	New		**Start date:**	04/16/2013
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Version:	0.8.0		**OS:**	Linux

Description

Here's how it is reproduced:

1. Quassel is hidden in the tray (I have 2 servers, one is almost always disconnected, the other is running with 3 channels (over SSL).
2. Network problem occurs causing a loss of network connection (Quassel tries reconnecting).
3. Bring up the Quassel window from the tray.
4. Click the channels with mouse (the lists of users are empty, so I presume the reconnection failed).
5. At some point (takes about 3-5 clicks to switch between the channels) Quassel crashes (debug info is created, hopefully it is somehow accessible or useful to you).

Running KDE 4.10.2 on Ubuntu 12.04.

Attached the crash dump, generated at the latest crash.

#2 - 11/06/2013 07:22 PM - godgodgodgo

Same problem here.
I change channel after going off the window for a bit and then Quassel crashes.
I'm using windows 8.1 and using this build: http://winkde.org/~pvonreth/downloads/quassel/unofficial/quassel-x86-setup-git-20131015.exe
I can't find any crash log.
