

## Quassel IRC - Bug #123

### "Mouse wheel changes displayed buffers" setting is not shown correctly

02/29/2008 09:32 PM - EgS

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>	phon	<b>% Done:</b>	0%
<b>Category:</b>	Quassel GUI (Qt)	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>OS:</b>	Any
<b>Version:</b>	0.13.1		
<b>Description</b>			
This option is always shown as "on" in the Settings dialog.			
Setting it works properly, but it's somewhat tricky as you sometimes have to change some thing different to even be able to click "apply"...

unfortunately i cannot reproduce this bug.  
it should be a problem with the load and save - but is looks just fine for me:

```
load:
UiSettings uiSettings("Ui");
settings["MouseWheelChangesBuffers"] = uiSettings.value("mouseWheelChangesBuffers", QVariant(true));
ui.mouseWheelChangesBuffers->setChecked(settings["MouseWheelChangesBuffers"].toBool());
```

```
save:
UiSettings uiSettings("Ui");
uiSettings.setValue("MouseWheelChangesBuffers", ui.mouseWheelChangesBuffers->isChecked());
```
