**Description**

Hi,

I'm the dev of <https://github.com/phhusson/QuasselBots/> (bots in C/lua connecting to a quasselcore), and to extend its capabilities (or of similar projects), having a 'bot' flag on connection would be great.

Possible uses I see are:

- for the clients connected counter: the automatic go to away no longer work with a connected bot.

This would enable events on away monitoring the networks away flag.  
(Linked to <http://bugs.quassel-irc.org/issues/728> )

- Have a /internal command that sends commands to connected bots (with the ability to add a message to a buffer without actually sending it to the IRC server, that would be perfect !)

(Linked to <http://bugs.quassel-irc.org/issues/1107> )

But there may be other possible uses

Thanks

#### #1 - 05/05/2014 01:43 PM - phhusson

Having a way to send a message to a buffer without sending to IRC server would also help <http://bugs.quassel-irc.org/issues/1282>
