

Quassel IRC - Bug #1439

Quassel join channels when single-clicking the name in the bufferview

06/12/2017 08:19 PM - raljung-e

Status:	New	Start date:	06/12/2017
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.12.4		
Description			
<p>This has already been reported 9 years ago as http://bugs.quassel-irc.org/issues/298, and then fixed, but now the bug seems to be back: When I single-click a channel in the list on the left, it joins the channel.</p> <p>This could be related to me using the default KDE setting of "single-click" -- but that shouldn't make it impossible to view the backlog of a channel without re-joining it.</p> <p>This is with Quassel 0.12.4 from Debian.</p>
