**#1 - 01/20/2018 10:27 AM - genius3000**

- Status changed from New to Closed

Duplicate of [#581](#)

/msg isn't logged intentionally to protect the logging of sensitive information (passwords, etc). If you are using /msg in an alias (or in general) that you want logged, use either:

1. If used within an active channel or query buffer: /say <msg>
2. If used from anywhere and has a dedicated target: /query <target> <msg>  
Note that the latter will open a query buffer for 'target'.
