

Quassel IRC - Bug #1484

Notifications Settings page always pops "Unsaved changes" dialog

05/22/2018 07:20 PM - phuzion

Status:	New	Start date:	05/22/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Windows
Version:	0.12.4		
Description			
Summary:			
There is a warning dialog about unsaved changes every time the user navigates to the Settings > Interface > Notifications page, regardless of whether changes were actually made.			
Steps to Reproduce:			
<ul style="list-style-type: none">• Open Settings > Configure Quassel• Click Notifications• Click another option (Highlight, for example)• User is presented with a warning dialog that reads "There are unsaved changes on the current configuration page. Would you like to apply your changes now? Save Cancel Discard"			
Expected result:			
There should not be a dialog warning about unsaved changes, if no changes were made.			
Actual result:			
An unnecessary dialog is presented to the user, causing confusion.

History

#1 - 05/22/2018 08:26 PM - romibi

The issue is snore ...
It doesn't allow detecting changed settings and you either won't be able to use "apply" or get this "settings changed" window on leaving
#quassel@freenode:

2018-02-05 16:47 CET <TheOneRing> romibi: its a hack
2018-02-05 16:47 CET <TheOneRing> it was the only way to allow settings on that page
Still, it would be nice if a cleaner solution would be found...
