

Quassel IRC - Bug #1498

macOS client requires high performance GPU

09/25/2018 04:17 PM - lori

Status:	New	Start date:	09/25/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.12.4		
Description			
<p>The macOS client forces the use of the high performance dedicated GPU on a dual-GPU system, such as the AMD Radeon found on a 2017 MacBook Pro instead of the integrated Intel GPU. When quitting the client, the OS returns to using the integrated GPU.</p> <p>I assume it is one of the underlying libraries causing this, but it would be nice to be able to track down which, and if there is a way to build the client in a way that this doesn't happen, to save battery life.</p>
