Description

I set custom fonts via Preferences in 0.12.5. It worked fine.

After upgrading to 0.13-rc2, the Quassel client uses the default font, and data in Preferences appears corrupted. For example, in the attached image "Custom chat window font" shows "@Variant(13pt", which seems wrong.

Environment: macOS Mojave, Qt 5.11.2 from MacPorts, Quassel client 0.13-rc2 compiled from source.
