

Quassel IRC - Feature #1761

Support geo: URIs

09/30/2021 03:46 PM - StyXman

Status:	New	Start date:	09/30/2021
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:			
OS:	Any		
Description			
geo: URIs are used for sharing location among map applications. The support on the quassel side should be similar to the one handling HTTP/S links.

I'm working on implementing this. Could you please provide a few examples of geo: URIs for me to test with?

#2 - 05/17/2022 08:54 PM - StyXman

it's quite basic, geo:<lat>,<lon>?z=<zoom>, where lat and lon are floats and zoom might be an integer or a float.

#3 - 05/18/2022 06:25 PM - phuzion

Thanks. I've tested with the following two URLs:

```
geo:37.786971,-122.399677
geo:37.786971,-122.399677?z=2
```

The first works fine, but the second doesn't fully capture the entire URL (it stops at the numbers). I'm still working to determine what we can do to get this working as expected.

I currently have a WIP PR on GitHub at the following URL: <https://github.com/quassel/quassel/pull/608>

If you have any suggestions on how to improve this PR, please let me know.
