LDAP Documentation Missing

03/19/2022 04:26 AM - hydrian

Status:	New	Start date:	03/19/2022
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Core	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.14.0		
Description			
While most LDAP parameters are self-explanatory and don't really need any documentation, the LDAP filter syntax isn't. The admin needs to know the variable/character string that is used for replacing the user entered username during login process. I didn't see any place in the wiki or the man pages that talks about this.
