Generally our part messages can be seen in the log.			
It's important cos when you're out off a chan you now if you need a backlog or not. Other clients give that.

Part messages were already shown.

Quit messages are now shown too:

Fixed in current git:

#2 - 12/22/2008 09:45 PM - ZRegis

Quit messages are not added when the core is stopping e.g. during a VM restart.

#3 - 12/23/2008 12:24 AM - EgS

As long as the core is stopped cleanly (ie. SIGTERM or SIGINT) a Quit message is written to all buffers.

If the core is stopped otherwise (SIGABRT, SIGSEGV, SIGBUS, SIGKILL) there is no quit message. And there is just nothing we can do about it
