<b>Description</b>	
<p>Hi ppl,</p> <p>after i start quassel my first action is, to click every channel to mark it as read. otherwise i cant see in wich channel a ppl is writing something becaus in every channel comes a welcome message or the topic. this sucks a little bit. it would be great to have a shortcut to mark all channels as read.</p> <p>maybe im not the only one who miss this feature :)</p> <p>btw my first post here and i want to say: thanks for the great client ...</p>
