

Quassel IRC - Feature #452

Add option to minimize to tray on startup

12/23/2008 01:52 AM - sph

Status:	Resolved	Start date:	
Priority:	High	Due date:	
Assignee:	Sputnick	% Done:	100%
Category:	Quassel GUI (Qt)	Estimated time:	0.00 hour
Target version:	0.4.2		
OS:	Any		
Description			
Someone asked me about this, as far as I know there is no such option. It might be useful if you automatically launch Quassel when starting the desktop.

Revision 65e81b756816cc4ac0eeb4628552ccfd8a3b1ac3 - 05/13/2009 11:16 PM - Manuel Nickschas

Properly save and restore the mainwindow state

We now save size, position, maximize, minimize and hidden-to-tray on exit and restore it at next start. Since Qt's restoreState() has some issues, I had to workaround things a bit, so please test on your system and report if there are still problems with the current implementation!

Fixes #677, fixes #452 (since the state is remembered, so just quit Quassel using the tray context menu while it's hidden).

#2 - 05/13/2009 11:29 PM - Sputnik

- Assignee set to Sputnik

- Target version set to 0.4.2

Since the state is now properly remembered on exit, just quit Quassel while it's hidden using the tray context menu to have it startup hidden again.

#3 - 03/03/2013 06:05 PM - omeringen

This is not working, for me at least. KDE 4.10

Any confirmation ?

#4 - 03/03/2013 08:35 PM - Anonymous

"This" is nicely vague of you, given how the commit implements several things. Assuming you mean restoring to system tray, see [#1133](#), which has a fix.

#5 - 03/04/2013 04:58 PM - omeringen

"this" was about Sputnik's comment.

Again, please see if the patch i linked you to several times fixes it. If not, leave a comment at [#1133](#) as this issue is now linked to commits which do more than just the systray and i'm not going to reopen it when there's an open issue already.

#7 - 03/04/2013 10:11 PM - omeringen

Actually my question is not only about system tray. According to Sputnik's comment, quassel was remembering the state (whatever it is, system tray or maximized) once upon a time. [#1133](#) is only about system tray. Anyway, just wanted to say "remembering the last state" is not working anymore.
