**Description**

It would be nice if quassel first tab-completes nicknames who had last written in a channel and not only in alphabetical order (like konversation does). I'm unsure if this mode has a speacial name. It would be enough to save the last x minutes ..

e.g.

nicks in a channel: ayaron ayrin beron Steve`

ayrin: This is a test
beron: yes
Steve`: ay[TAB] completes to ayrin, not to ayaron
