

Quassel IRC - Feature #589

Update unread message marker after new messages arrive and not after channel switch

03/01/2009 08:17 PM - billie

Status:	New	Start date:	03/01/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:			
OS:	Linux		
Description			
<p>Currently when you switch to a channel where you have unread messages you get the unread messages marked by a line that disappears after you switch to another channel and back. What about leaving the marker at the current position and only update it when there are new messages instead of directly setting it to the end after a channel switch. So when you switch to a channel where you want to read messages and accidentally switch to another channel you don't lose the marker and you still know where to read on.</p>
