| <b>Target version:</b>  |          | <b>OS:</b>             | Linux             |
| <b>Version:</b>   | 0.4.0+   |                        |                   |
| <b>Description</b>  |          |                        |                   |
| Using KDE4, on Intrepid.  |          |                        |                   |
| To reproduce:   |          |                        |                   |
| *Connect to a core  |          |                        |                   |
| *Disconnect networking  |          |                        |                   |
| *Look at "connect" button still being disabled.   |          |                        |                   |
| Not a huge issue, since I can use the menu to connect again - but annoying, since the toolbar is basically useless because of this. |          |                        |                   |

### History

#### #1 - 06/14/2021 04:25 AM - phuzion

I am unable to reproduce this issue on Windows 10 20H2 or Fedora 34, both running Quassel 0.13.1 or newer.

I suspect that at some point, this was fixed without realizing, perhaps the result of a code overhaul.

I'm going to close this issue, but if you continue to have this issue, more than a decade later, please feel free to reopen it.
