

Quassel IRC - Bug #827

Cookies in Preview Browser

10/13/2009 11:33 AM - Creap

Status:	Rejected	Start date:	10/13/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.6-pre		
Description			
If I hover a link to a page that requires login credentials, I simply get the login page, regardless if I'm logged in to that page in any of my other web browsers.			
Quassel should implement some way to import or add cookies to the Preview Browser.

(Ab)using the cookies of your browsers would be a major security hole.

-> rejected

Even a simple tool as wget can get/store cookies. If it would be possible for me to manually add cookies for a number of sites (like Facebook for instance) specifically for Quassel that would be fine, Quassel doesn't have to access my browser cookies.
