Quassel IRC - Bug #931

Input widget newline population with per-chat history

03/05/2010 07:01 PM - jotik

Status:	Closed		**Start date:**	03/05/2010
Priority:	Normal		**Due date:**	
Assignee:	MarcLandis		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Version:	0.7-pre		**OS:**	Linux

Description
Quassel 0.6_rc1. When per-chat history is enabled, switching from buffer A to buffer B (using the mouse) adds a new line to the input widget for buffer A, making the input widget for buffer A contain more and more empty input lines. The new lines can be seen when switching back to buffer A.

History

#1 - 03/06/2010 01:18 AM - johu

- Status changed from New to Assigned

- Assignee set to MarcLandis

#2 - 03/09/2010 05:58 PM - MarcLandis

- Status changed from Assigned to Feedback

I am not able to reproduce this behavior.

#3 - 08/11/2010 11:29 PM - johu

- Status changed from Feedback to Closed

- Version changed from 0.6-pre to 0.7-pre

developer, tucos and me can not reproduce this with current master version (0.7-beta1+1 git-adec06f*)
